# A management process automation company

## ABOUT ACTIVEOPS:

Our management process automation software empowers managers with real-time data and the know-how to use those actionable insights to kickstart growth-enabling initiatives. In short, we boost team productivity through meaningful, accurate data by leveraging the latest Microsoft technology, such as Azure and Power BI.

### What our customers are saying

*"The ease of having Workware+ solutions available to our staff has meant we can keep track of both performance and forecast volumes to enable accurate decision-making."*

*— Elle Bianco, Leader Vendor Management Offshore, CoreLogic*

## WHAT WE OFFER

Workware+ brings together the ControliQ and WorkiQ software solutions to create a holistic view of your workforce, processes, and productivity.

ControliQ enables managers to simplify operations management and increase employee productivity. Our automated data collection and reporting gives managers a clear visibility of their business capacity so they can leverage real-time data to optimize and accurately plan ahead.

WorkiQ is our employee productivity monitoring solution and applies to on-premises employees, remote workers, and robots. It can also be deployed anywhere to capture a 360-degree view of your entire workforce.

ActiveOps empower a new purpose for your data: to ensure your employees' well-being while achieving maximum performance.

# Why Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

**Microsoft Azure**

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
