

Introducing AOM for WorkiQ

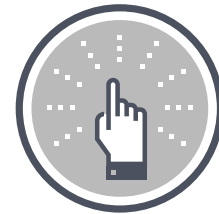

All coaching is delivered remotely!

VISIBILITY

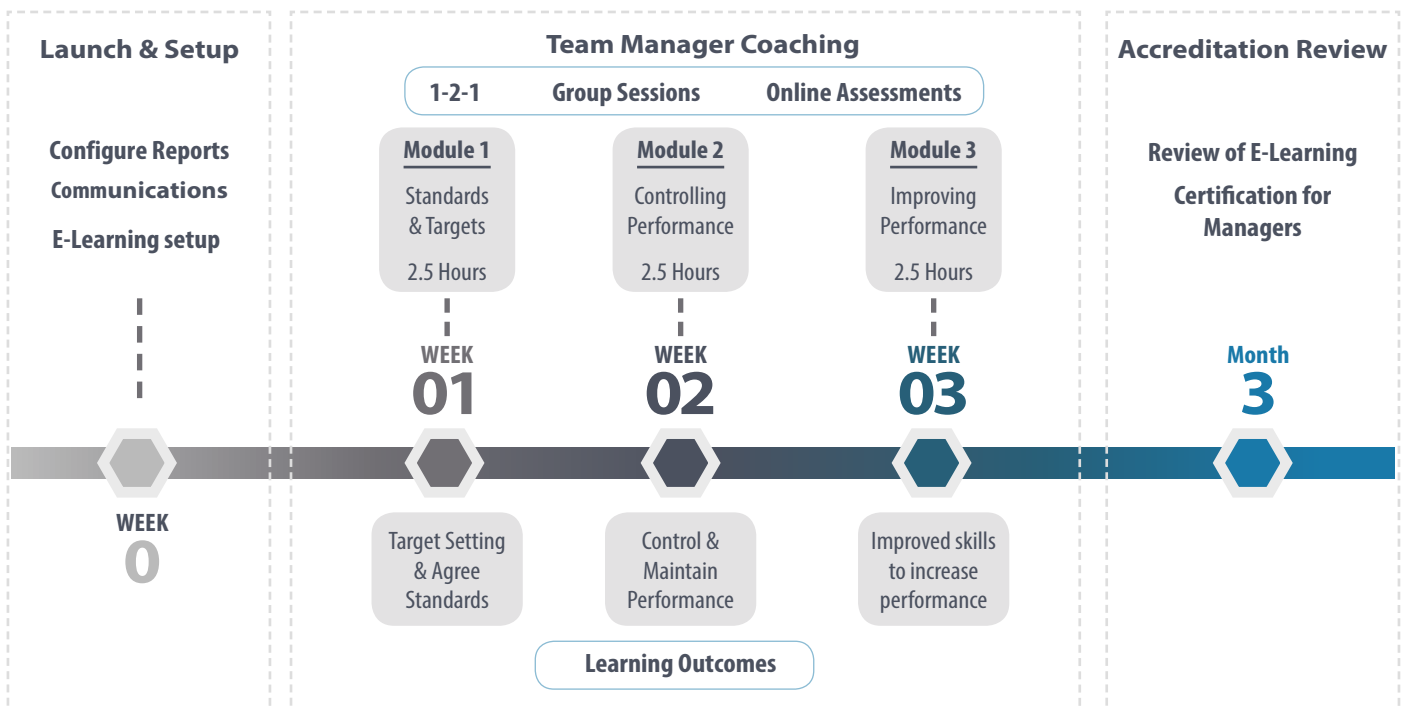

INSIGHT

CONTROL

WorkiQ is not just workforce intelligence software, it's operations management capability for front line leaders. While learning the fundamentals of operations management, our customers learn to make data-driven decisions using WorkiQ. The result? Confident leaders, controlled operations and improved performance. The course is designed to incorporate operations best practices into daily routines and maintain those behaviors via a sustainability program. At the end of the course, participants receive certification from ActiveOps - a globally recognized leader in digital operations.

REMOTE

EFFICIENT

EFFECTIVE

At ActiveOps we've conquered operations management. Our platform simplifies complexity and can boost productivity by 15-25% and higher, unleashing your operation's potential. Our technologies expose a 360 view of your digital and human operations — including remote workers. Make clear, data-informed decisions. Attack your most complex issues at scale. Amplify and accelerate your operations management and make the move towards operational excellence
